## About SprocketGO

SprocketGO is a bold new direction for digital directories. Built on an industry leading gaming platform SprocketGO Live incorporates the latest technologies to deliver fast, efficient and responsive performance. SprocketGO Connect has almost all the standard features of GO Live but operates without a permanent internet connection...a world first.

New from the ground up this innovative digital directory software includes swipe touch, rich graphic animations, timing control, improved content management, and of course all the standard features that Sprocket has been including for years.

With GO Live you can log on from anywhere and add tenants or update the directory template design. It's easy for even the most inexperienced of users.

Don't have internet access at the directory? No problem, GOConnect lets you update the directory from your PC and simply use your phone to provide a hotspot connection and the update is done in seconds!

SprocketGO Live and GO Connect are not rebadged digital signage applications or static image holders but a fully featured system that provides the highest level of functionality and control available today.

The image displays three digital directory screens. The first screen, for St Michael's Hospital, shows a welcome message, a list of departments (Gynaecology, Paediatrics, General surgery, etc.), and a weather forecast for Friday, 13th Oct 2017. The second screen, for North Tower, shows a list of tenants (Cavern Acoustics Pty Ltd, Timber Security, etc.) and a weather forecast for Friday, 13th Oct 2017. The third screen, for 408 Latrobe Street, shows a welcome message, a list of tenants (Innovation Expansion Corp, Savin Incorporated, etc.), and a weather forecast for Friday, 13th Oct 2017.

## Portrait Template P.0

### Minimum Tenants

Use this template when the tenants are less than 20 and you wish to have the flexibility to add image or movie files in several locations.

Remember that there is no real limit to the number of tenants as the system will display additional tenants by indexing through to the next screen.

The template design can be updated or changed at any time and published to the directory.

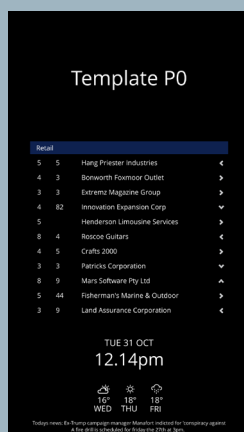

If internet connection is lost the directory will continue to display the last update.

### Features

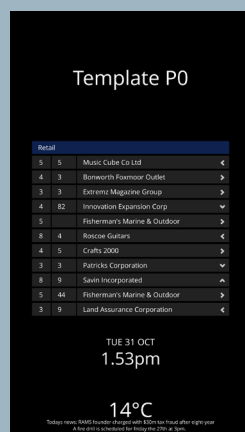

- Building welcome text
- Section headers
- Directional arrows
- Background images or movies
- Announcements \*
- Weather feed [same day or 3 day forecast]\*
- News Feed \*
- Date & time

\* These features requires internet connection

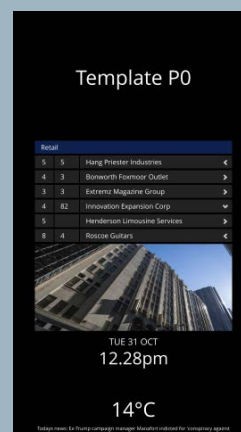

## P.0 Template Design Options

# Using Standard Templates

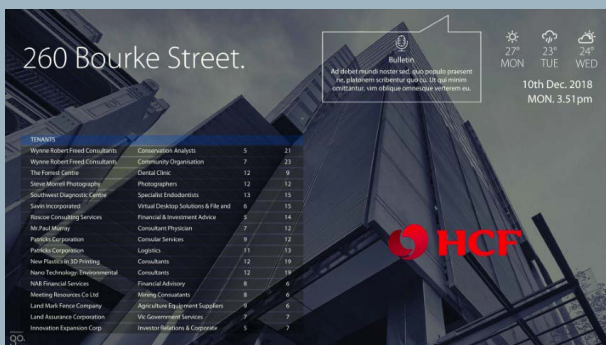

The beauty of the SprocketGO template system is that you don't have to develop custom solutions there are almost limitless variations that are possible using background images, logos, images and movie files.

Within the editor you can add transitions, colours and tint overlays to enhance your selections even further. Once a template has been built you can save it and create another for either a special event or calendar activity.

Contact the Sprocket team today to find out what GO can do...we'll even give you a free design solution.

Design variations based on the Portrait P0 Template

Design variations based on the Landscape L1 Template

## Models & Pricing

Sprocket offers a range of plans to suit every location and every budget from the largest multi storey building to a single corporate office. The choice comes down to what visual impact you require and how hands on you want to be.

**GO Live** is a fully managed system with powerful graphic templates: **GO Connect** has similar features but does not require internet connection just use your mobile to HotSpot.

### Go Live

**Sprocket GO Live** is our fully featured and fully monitored cloud based directory software, as powerful as it is elegant. GOLive is packaged with our Concierge and GOCare plans where every tenant update is managed by Sprocket for you at no extra cost and your system is monitored in real time to ensure your directory is always up and going. GOLive even caches the fully animated designs on the directory just in case the directory loses connection..how cool is that? Of course weather widgets and new feeds are standard and add that zing to your directory.

### Go Connect

**Sprocket GO Connect** is our off line version where connecting the directory to the internet is just too hard. With all the powerful software features of GoLive except widgets and feeds GO Connect still lets you remotely update the directory from your PC but requires you to simply use your phone to provide a HotSpot connection and the update is done in seconds!

## Subscription Plans [all prices are exclusive of GST]

	12 Months Month by Month	24 Months 12 Months Upfront	36 Months 36 Months Upfront
Sprocket GO Live	\$580	\$1080	\$1,440
Sprocket GO Connect	\$450	\$810	\$1,050

Please note Subscription Plans may vary depending on the installation quantity and level of customisation required. Sprocket offers a comprehensive graphic design service at competitive rates should you require a template design to suit your corporate style or any specific .
